Prevent, Diagnose & Treat Flu! Flu is a serious, contagious disease. Over 36,000 people die and 200,000 are hospitalized every year from influenza and influenza-related illnesses.

There is only ONE flu vaccine needed this season. This year's seasonal flu vaccine protects against 3 strains of flu including the H1N1pandemic strain. As a reminder, flu vaccinations should be given annually.

All people 6 months of age and older are now recommended to receive annual influenza vaccination. This is a new and expanded recommendation for this season. In February, 2010, CDC's Advisory Committee on Immunization Practices (ACIP) voted in favor of "universal" influenza vaccination in the United States to protect as many people as possible against the flu.

Let Henry Schein Medical help prepare your practice for flu season with the products to Prevent, Diagnose, and Treat Flu. Whether it is providing flu vaccine for your office staff and patients; supplying infection control prevention products; or diagnostic test kits and treatments, Henry Schein is your source for flu season.

Visit our Flu Resource Center website at **www.henryschein.com/flu** for the latest information about influenza and all the products you need to prepare your office for the upcoming flu season.

THINK PINK
HENRY SCHEIN®

Together we can make a difference! Henry Schein has partnered with the American Cancer Society to provide awareness and support to help in the fight against all cancers. A portion of our proceeds from our Think Pink Products will go to the American Cancer Society's Hope Lodge Program. Look for this logo inside.

Hope Lodge® provides cancer patients and their families a free, temporary place to stay when receiving treatment in locations that may not be easily accessible. A worry-free stay allows Hope Lodge® guests to focus on the most important thing—*getting well*.

Think Pink, Practice Pink.

Committed to the Health of Your Practice...

Trusted Advisor
Our knowledgeable Sales Consultants offer you the utmost attention and are specially trained to help identify ways to enhance your practice.

Price Integrity
We are highly competitive with our pricing. We strive to maintain prices, develop purchasing plans, and deliver the best value for your practice.

Guaranteed Fast Delivery
Orders received by 5pm local time are shipped the same day. Your products arrive within 24–48 hours in most areas.

Vaccine, Pharmaceutical & Diagnostic Solutions
We have relationships with major manufacturers and can supply every adult and pediatric vaccine recommended by the ACIP.

In addition, we can provide all of your flu vaccine needs with our Worry-Free Guarantee Flu Program!

Our pharmaceutical and diagnostic solutions include brand names as well as a complete line of generics and Henry Schein Brand options for added value.

Practice Solutions
We provide a complete array of services, from technology solutions to practice marketing, that are designed to help you achieve your practice goals.

We do that!™

Policies that protect

At Ansell, we're delivering long-term sustainable returns through initiatives that help protect and minimize the impact of our operations on the environment.

Here's what we are doing to make a positive impact on the world around us:

- Following sound environmental practices through all our activities, products and services
- Managing operations so they are energy-efficient and cost-effective, reducing adverse environmental effects
- Training employees to increase their environmental awareness and responsibility
- Minimizing the use of materials, supplies and energy in all areas
- Recycling materials where practical
- Setting and continually renewing objectives and targets for pollution prevention
- Promoting the adoption of similar environmental protection policies by suppliers, vendors and contractors

Sustainability is in our hands.

At Ansell, we are committed to being green.

Now featuring increased glove counts per box to help you go GREEN

Increased glove counts per box means less packaging waste into the environment, fewer box changes mean a more productive office, and the new box fits in current box holders.

The Prohibit® N95 Flat-Fold Respirator Masks

This cone-style particulate respirator mask is N95 approved and meets NIOSH and CDC guidelines for TB exposure. Cone shape and fluid-resistant material help reduce the risk of fluid strike-through. An advanced microfilter medium protects against micron-size particles. Double bands secure mask to face.

CDC's Advisory Committee on Immunization Practices Recommends Universal Annual Influenza Vaccination

A panel of immunization experts voted today (February 24, 2010) to expand the recommendation for annual influenza vaccination to include all people aged 6 months and older. The expanded recommendation is to take effect in the 2010–2011 influenza season. The new recommendation seeks to remove barriers to influenza immunization and signals the importance of preventing influenza across the entire population.

Discussion at the ACIP meeting focused on the value of protecting all people 19 to 49 years of age, who have been hard hit by the 2009 H1N1 pandemic virus, which is likely to continue circulating into next season and beyond. Another reason cited in favor of a universal recommendation for vaccination is that many people in currently recommended "higher risk" groups are unaware of their risk factor or that they are recommended for vaccination. Annual influenza vaccination is a safe and preventive health action that benefits all age groups. However, certain people have a higher risk for influenza complications, including people aged 65 years and older, children younger than 6 months of age, pregnant women, and people of any age with certain chronic medical conditions.

These people, their household and close contacts, and all health care personnel should continue to be a primary focus for vaccination efforts as providers and programs transition to routinely vaccinating all people 6 months of age and older.

The osom® truth about rapid flu testing

Visit us at **osomflu.com** for details on our flu promotion!

There's been some confusion and concern with healthcare professionals regarding the use of rapid influenza diagnostic tests (RIDTs) for the detection of seasonal or novel influenza. Some tests showed poor sensitivity during the 2009 outbreak.

Yes, there are more sensitive diagnostics available, but they are more time consuming, expensive, and complex. Faster is better, and tests of greater sensitivity are not readily available in the majority of laboratories. So, RIDTs continue to be a useful tool.

Genzyme Diagnostics' OSOM® Influenza A&B Test differentiates between flu A and B with results in 10 minutes and requires less than one minute hands-on time. The test is objective, easy-to-use, and detects H1N1 strains*. With the support of our experienced team of medical technologists and skilled professionals, you can be confident that the OSOM® Influenza A&B Test delivers the highest quality available. The OSOM® truth, yes awesome.

For more information 800 332 1042 or www.genzymediagnostics.com

genzyme Diagnostics

* Although this test has been shown to detect the Mexico/4108/2009 H1N1 virus cultured from a positive human respiratory specimen, the performance characteristics of this device with clinical specimens that are positive for the 2009 H1N1 influenza virus have not been established.

genzyme Diagnostics

OSOM® Ultra Strep A Test

Ultrasensitive strep A test with the ease of use and rapid results your busy practice needs. Studies show sensitivity of OSOM Ultra Strep A test and standard single-swab culture method are not statistically different.

- CLIA waived
- Easy to use
- Easy-to-read, 2-color results in minutes
- Room-temperature storage
- Includes positive and negative controls

Welch Allyn

SureTemp® Plus 690 Electronic Thermometers

Combines the speed of ear thermometry with the accuracy and reliability of traditional oral thermometry. Takes fast, 4–6-second oral temperatures, 10-second pediatric axillary and rectal temperatures, and 15-second adult axillary temperatures.

- Accurate to within +/- 0.2°F (0.1°C)
- Interchangeable, removable probe wells to reduce the risk of cross contamination
- Large LCD that can display temperatures in Fahrenheit or Celsius
- Last-temperature recall
- Mode selection and recall buttons
- Four different temperature modes
- Convenient storage for 25 probe covers
- Takes about 6,000 readings on 3 AA batteries (included)

Kleenex® Slimfold Towel Dispensing System
Slim design fits the tightest spaces. One-at-a-time dispensing reduces waste. Exclusive absorbency pockets provide excellent absorbency and hand-drying performance in an environmentally sound product. Towel Dispenser is a compact 14" high and 2.75" deep. This innovative design dispenses a regular-sized towel that folds five times instead of two for the same drying ability in a compact size. Accommodates up to 225 towels to help reduce maintenance.

HEMOSURE® iFOB TEST

-Immunochemical Fecal Occult Blood Test (FIT)

Clinically and Financially the right choice for Colorectal Cancer Screening (CRC)

"The ACG supports the joint guideline recommendation that older guaiac-based fecal occult blood tests be abandoned as a method for CRC screening... the ACG recommends the FIT as the preferred cancer detection test."

Roche

CoaguChek XS® System
PT/INR Monitoring Solution

The next generation in point-of-care prothrombotin (PT) and international normalized ratio (INR) testing, this new system uses exclusive smart technology to help ensure accurate results and offers the flexibility and control that healthcare professionals need to confidently manage a wide range of anticoagulated patients. It is the only system to perform onboard quality control and determine patient results in a single test chamber.

- CLIA waived
- Neutralizes therapeutic levels of heparin and LMWH
- INR corrected for hematocrit within specified range; manage a broad array of patients with a single device
- Small sample size (10 µL) for easy dosing
- Strip allows dosing from either top or side for simple blood application
- Small, battery-powered, handheld meter for portability and efficiency
- New onboard controls; no external QC necessary
- Auto-on with strip insertion and auto-off capabilities
- 18-month strip shelf life; no refrigeration needed

CAN REAL-TIME RESULTS LEAD TO BETTER OUTCOMES?

The potential benefits of point-of-care A1C testing

- The ADA recommends that healthcare professionals use A1C point-of-care testing for timely decisions on therapy changes[1]
- Giving patients with diabetes on-the-spot feedback on their A1C number may result in as much as a 1% point reduction in their A1C overtime[2]
- A 1% point reduction in A1C may lower the risk of complications by up to 40%[3*]

More efficient than the lab

- Results in 5 minutes
- Portable – use in multiple exam rooms
- Small (5µL) blood sample
- Easy to use – minimal training required
- No maintenance

Key features

- Lab accuracy
- National Glycohemoglobin Standardization Program (NGSP) certified
- CLIA waived
- Reimbursable – bill to CPT code 83037

Bayer's A1CNow+® Multi-Test A1C System

Helps You Improve Your Patients' A1C Results. Bayer's A1CNow+® provides you with a fast and easy way of obtaining accurate A1C results in your office. This innovative technology enables you to communicate face-to-face with your patients about their diabetes control.

ORDER NUMBER	DESCRIPTION
DCD3024	A1CNow+® Mult-Test A1C System, 1 kit - 10/bx
DCD3021	A1CNow+® Mult-Test A1C System, 1 kit - 20/bx

Basic features

- Test time - 5 Seconds
- Memory - 480 results
- Sample size - 0.6µL

Accuracy

- Auto-calibration
- No manual coding
- Automatic Hematocrit correction

Advanced features

- 2 Settings — Basic (L1) and Advanced (L2 modes)
- 7-, 14-, and 30-day averages
- 7-day HI and LO summary
- Individual HI and LO ranges
- Pre- and post-meal markers
- post-meal test reminder

Bayer's CONTOUR® Blood Glucose Monitoring System

For fast, accurate results using No Coding™ technology, automatic underfill detection, control marking and temperature correction. PC download option available. For use with CONTOUR™ Blood Glucose Test Strips.

The perfect pair for testing diabetic patients.

HbA1c and Microalbumin are both available for point-of-care (POC) testing.

Answers for life.

The perfect pair (HbA1c & Microalbumin for POC testing):

- Perform quantitative urine microalbumin, creatinine, and albumin-to-creatinine ratio tests, and CLIA-waived HbA1c for managing diabetes on one analyzer: the DCA Vantage® analyzer
- The DCA Vantage analyzer has over 15 years of proven performance in the point-of-care (PoC) testing segment and over 100 peer reviewed articles to provide confidence in test results
- As another option, the CLINITEK Status® analyzer can provide a CLIA-waived, semi-quantitative urine microalbumin, creatinine, and albumin-to-creatinine ratio result, in about a minute
- You can use both the DCA Vantage and the CLINITEK Status analyzers in CLIA-waived offices for monitoring the HbA1c and microalbumin levels of patients with diabetes, as recommended by the ADA

SIEMENS

DCA™ Vantage Analyzer

Point-of-care immunoassay analyzer for diabetes management. Provides precise and accurate quantitative test results for HbA1c in whole blood during a patient's visit to help improve decision making. With a single urine sample, the analyzer also provides quantitative test results for low levels of albumin, creatinine, and A:C ratio in the physician's office or clinic.

A Cool Way to Remove Common Warts & Benign Lesions
Histofreezer® Portable Cryosurgical System[1]
NO HAZMAT FEE
• Clinically proven, safe and easy-to-use
• Results are comparable to Liquid Nitrogen
• Histofreezer is patient friendly with a low risk of pain and scarring
• Application takes 40 seconds or less
• Does not require a Freeze-Thaw-Freeze procedure
• Does not require the use of messy and leaky cones, unlike other cryosurgical products
• Requires no bulky equipment or initial capital investment, unlike Liquid Nitrogen
• Histofreezer is CFC-Free and ozone-friendly
• Economically priced and reimbursable
• NO HAZMAT FEE + All Inclusive Kits = Greater ROI
Wart Removal, Easy as 1-2-3*

Portable Cryosurgical System

OraSure Technologies, Inc.

Histofreezer® Portable Cryosurgical System

Portable cryosurgical system used by medical professionals to easily and inexpensively remove warts and other benign lesions. Clinically proven, effective, and easy-to-use treatment for adults and children older than 4 years. Lower cost per treatment than competing products—no à la carte costs and no freeze-thaw-freeze procedure is needed.

- Patented cryogenic delivery system: no messy or leaky cones
- Long shelf-life, CFC-free, and ozone friendly
- Highly reimbursed through most insurance plans
- No HAZMAT fee
- All-inclusive kits: higher ROI for your practice

Formalin Filled Containers

Save time and reduce formaldehyde exposure and spills with prefilled formalin containers designed for the safe collection, preservation, transportation and storage of specimens. Produced from polypropylene, choose from highly leak-resistant Tite-Rite™ containers or leak-resistant large containers, both prefilled with 10% neutral buffered formalin.

- Containers have formalin warning labels with a writing area for patient information
- Tite-Rite™ containers have molded graduations and the lids are produced from polyethylene and feature an inner liner to safeguard against leakage
- Large containers have leak-resistant aluminum lids

PanOptic™ Ophthalmoscope Heads

Ergonomically designed for maximum comfort, balance, and access to controls. Aperture dial allows clinician to select micro, small, and large spot sizes. Also includes red-free filter and slit aperture. Dynamic Focusing Wheel adjusts focus in a continuous, smooth action for more precise control and optimal view. Available focusing range is from -20 to +20 diopters. Patented Glare Extinguishment System prevents interference from unwanted glare and reflections. Patented Axial PointSource Optics makes it easy to enter undilated pupils, and provides a 25° field of view, resulting in view of fundus that's 5 times larger than that of a standard ophthalmoscope in an undilated eye. Halogen HPX™ lamp provides whiter, brighter light. Cleanable, reusable eyecup establishes and maintains proper viewing distance, provides image stability, serves as a pivoting point for panning around the retina, helps with orientation, and screens out ambient light. Compatible with any standard 3½-V power source including desk charger handles, convertible battery handles, wall transformers, and lithium-ion Power Handle.

KONICA MINOLTA

ImagePilot LS – entry level, all-in-one

The All-In-One digital radiography solution configured for small, low volume private practice health-care providers who want the simplest transition to digital and the ability to expand.

Standard ImagePilot Features:

- All-In-One Design—Easiest for the staff to learn. Reduces IT support requirements.
- AutoPilot—Automatic image processing for unsurpassed consistency in image quality.
- Simplified Image Acquisition—Single click workflow increases productivity.
- Same User Interface At Every Workstation—learn only one system.
- Easy-To-Use And Feature Rich Viewing Screen—Image adjustments, annotations, measurements, inputs and outputs, customizable for basic to advanced users.

ImagePilot LS Highlights:

- Rapid Output Speed—40 cassettes per hour.
- Redundant Storage—mirrored 500GB hard drives (RAID 1).
- Distribute Workflow with Multiple Users—Two additional licenses (3 total inc. the server).
- Import Priors or Export Patient Images to CD—Better than film for transportability and viewing.

Contact your Henry Schein Sales Representative for more information.

It's all about protection.

3 tools that address the risk factors associated with injuries and infections.

1 Plus SUTURES®
Antibacterial Sutures

Kill bacteria on the suture[1,2]

- Proven in vitro, Plus SUTURES create a zone of inhibition around the suture against the most common surgical site pathogens[2,3,4,5]:
  - *Staphylococcus aureus*
  - *Staphylococcus epidermidis*
  - Methicillin-resistant *Staphylococcus aureus* (MRSA)
  - Methicillin-resistant *Staphylococcus epidermidis* (MRSE)
  - *Escherichia coli**
  - *Klebsiella pneumoniae**

*Effective on MONOCRYL Plus and PDS Plus

SUTURES Plus Antibacterial Suture

2 ETHIGUARD*
Blunt Point Needle

Lowers risk of needlestick injury

- ETHIGUARD Blunt Point Needle is proven to be effective and user-friendly[6]
- Especially suitable for fascia and muscle layer

SUTURES

Surgical sutures since 1887

3 DERMABOND®
Topical Skin Adhesive

Provides a proven microbial barrier[7]

- Fast, painless solution for topical wound closures
- Provides needle-free skin closure

DERMABOND® TOPICAL SKIN ADHESIVE
Complete closure.

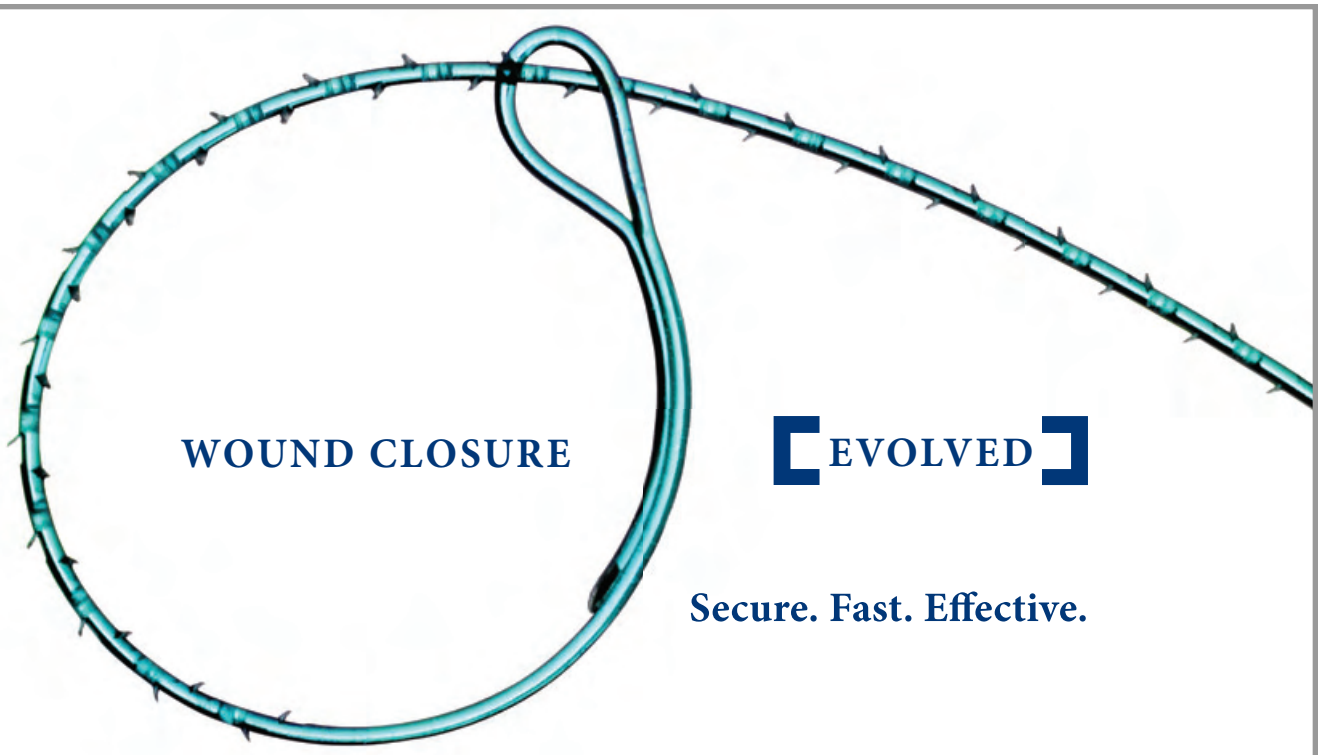
REDEFINING EXCELLENCE



WOUND CLOSURE EVOLVED

Secure. Fast. Effective.

V-Loc™ 180 Absorbable Wound Closure Device

Coming Soon…

the **V-Loc™ 90 Absorbable Wound Closure Device,*** the latest addition to our family of knotless wound closure devices.

The V-Loc™ 180 device is a revolutionary technology that supports optimal patient outcomes by closing wounds securely without the need to tie knots.

- Distributes tension throughout the wound
- Closes wounds up to 50% faster[1,2]
- Has the potential to reduce knot-related complications

This changes everything.
And you don't have to change anything.

100% Impressive.

100% Crosstex®!

Sure-Check®— the **better** way to sterilize.

When you need to be sure, it needs to be Crosstex. That's why Crosstex offers a**better** way. Sure-Check Sterilization Pouches with multi-parameter indicators meet all three criteria for sterilization – time, temperature and presence of steam.*

That's 100% impressive! 100% Crosstex!

Crosstex Sure-Check Sterilization Pouches also:

- ✓ Give users the assurance of confirming all three sterilization parameters.
- ✓ Meet ISO and CDC Infection Control Guidelines for effective sterilization.
- ✓ Include both an **INTERNAL** and **EXTERNAL** multi-parameter indicator.
- ✓ Eliminate the extra step of adding a separate multi-parameter indicator to each pouch.
- ✓ Provide the highest level of sterility assurance – when used in conjunction with weekly biological indicators.

We've got you covered.

Stop Infections by Validating Your Cleaning Protocals!

Ruhof ATP Complete® and Test® Swab Contamination Monitoring System

Win the fight against HAI's with one simple 15 second test.

Ruhof ATP Complete® is a rapid, simple and reliable method for verifying the effectiveness of your cleaning protocols. Testing critical surfaces, including hand hygiene, for microbial contamination after cleaning will allow you to validate your cleaning process, help lower cross contamination, prevent HAI's in the workplace and enable you to take immediate corrective action if needed. The hand held unit can be synced to a PC where results can be used to run comparison charts and produce color trend analysis, graphs, and reports.

GLO GERM

Glo Germ Kit 1003–Gel

Complete Kit
(115-6101-JN) .....ea
Contains: handheld 9-LED ultraviolet flashlight, 1–8-oz bottle of Glo Germ gel, 1–1.9-oz bottle of Glo Germ powder & battery with case.

Glo Germ™ Gel

Gel is brilliant blue-white under UV light. Used to demonstrate proper hand washing and is recommended where staining may be of concern. Each 8-oz bottle is good for 75 to 100 applications.

8-oz Bottle
(115-6115-JN) .....ea

Glo Germ™ Oil

Oil is bright orange under UV light and is used to demonstrate proper hand washing. Used in the medical field where greater accuracy is required. Each 8-oz bottle is good for 75 to 100 applications.

8-oz Bottle
(115-6113-JN) .....ea

Glo-Brush Applicator

Glo-Brush lets you apply a thin layer of powder to any surface quickly and without waste. Refillable powder reservoir and a cover to protect bristles. Comes with a 4-oz container of Glo Germ™ powder that will last for hundreds of demonstrations.
(115-6106-JN) .....ea

Glo Germ™ Mini Gel

For greater convenience, we now offer the new 2-oz Mini Gel. Same great product as the 8-oz version. Used to demonstrate proper hand washing. 30 to 50 applications.

2-oz Bottle
(115-6116-JN) .....ea

Glo Germ™ Powder

Used to demonstrate proper surface cleaning as well as the spread of germs, especially in the area of cross contamination. Good for hundreds of demonstrations. Brilliant white (also available in orange by special order; contact us for details).

1.9-oz Bottle
(115-6117-JN) .....ea

Henry Schein DxRx Solutions

We're there when you need us—with our DxRx Solutions Hotline

Do you have questions regarding the diagnostic, pharmaceutical and vaccine items you use in your practice? Need help finding a CPT code, package insert, or looking for brand to generic comparisons?

The Henry Schein DxRx Solutions Hotline provides information on the following topics for diagnostics, pharmaceuticals and vaccines:

- Indications and usage as provided on a package insert
- Package inserts
- Brand to generic comparisons
- CPT codes and J codes

- ACIP recommendations for vaccinations
- State Law requirements for school and day care entry
- Latest updates on supply issues, and much more

We do that!™
